

Engineering Summer Intern

Major Wastewater treatment Plant located in northern New Jersey is seeking an Engineering Intern for the summer of 2011 who has completed one (1) year of an engineering curriculum towards a Bachelor of Science or Engineering degree from an accredited college or university. This position requires an articulate, pro-active individual who can work independently as well as with other members of the technical staff. The candidate must possess a general knowledge of the fundamentals of Engineering. Under the supervision of an Engineer, the candidate shall perform basic engineering responsibilities such as performing calculations, drafting (Auto Cad), basic clerical duties and performing research. Will be required to attend a safety orientation program.
