**MEET & GREET**

Don't miss the Association's MEET & GREET PARTY on the 6<sup>th</sup> Floor at the Bally's Diamond Club on Tuesday night, May 10, 2011. It's always a great way to see your old friends and meet new ones. Our "Caribbean Night" theme will be complimented by Bally's mouth-watering cuisine. Attire is casual, New Jersey style or as they do in the Islands. Either way, slow down your pace and relax the Caribbean way at this year's Meet & Greet Party.

**THURSDAY EVENING ENTERTAINMENT**

Teaming up with our friends at the New York Dinner Theater, we've come up with a new twist to our Conference Gala. The theme for our 2011 Grand Finale is "NJWEA's GOT TALENT".

You've seen some of that talent over the years at many of our conference dances and events - it's time we turn on the spotlight and bring out our stars.

As they've done so many times in the past, the Dinner Theater Group will host our show, provide a talented cast to interact with the audience and contestants, while providing a variety of music for everyone's listening and dancing pleasure.

Please don't miss the fun. Mark your calendars for Thursday evening; May 12, 2011 at Bally's where NJWEA's got talent!

If you're interested in becoming a contestant, please contact our Grand Finale coordinators:

A comprehensive and interactive six hour course that outlines the offensive and defensive driving attitudes we experience each day. The good, the bad, and the ugly. Participants will be eligible for a 5% or \$50.00 insurance premium reduction for three years. (NJ State Law). Also for those who need it, we can deduct two points off your NJ Drivers License. (Unfortunately we can't bank the point reduction, it's a one time deal that we can do only once every three years)

Natural gas production from low permeability shale formations (shale gas) has recently become economically viable due to technological advancements in horizontal drilling and hydraulic fracturing. Shale gas is present in numerous and large “basins” around the world, including across the United States, and has been largely untapped due to the very “tight” nature of shale rock. With horizontal drilling and hydraulic fracturing, previously inaccessible natural gas is made to flow through newly formed fractures in the shale to production wells for collection. As a result of this new development, natural gas extraction from shale formations is one of the most rapidly expanding trends in energy production today. With this rapid expansion come numerous challenges and concerns, not the least of which is effective management of water resources and water quality concerns in nearby groundwater and surface waters. One of the largest and most promising shale gas basins in the United States is the Marcellus Basin located in the eastern states of New York, Pennsylvania, Ohio, Virginia and West Virginia. This area is ideally located to serve the many populous cities in the region, while also bringing considerable concern from the public and regulatory authorities regarding protection of the environment including the Delaware and Susquehanna river basins. The purpose of the workshop, *Water Management in Marcellus Shale Gas Exploration & Production*, is to provide an overview of the shale gas development activities in the basin, water resource and water quality management, concerns, existing and proposed regulations, and methods of addressing water management needs as this important and large resource is developed.

Summary:

The first portion of this session will explain the operations of a progressing cavity pump, how they operate and how to inspect them. It will show the various types of drive joints available and how to remove the stator and rotor and inspect the drive joint.

The second portion of this session will provide an explanation of the different types of installations available for channel type sewage grinders and inline sewage grinders. It will show how they operate and how to provide periodic maintenance to keep your units operating.

A Discussion with NJDEP and USEPA Managers

Hot Topics related to Water Resources

Moderators:

Thomas Amidon, Omni Environmental

Bryan Christiansen, Malcolm Pirnie

Discussion Format: EPA and NJDEP appointees will each be afforded an opportunity to present a 5-10 minute update on what is new in their agencies that might be of interest to the wastewater and water supply community. Q&A Session will follow. People who have questions for USEPA and NJDEP administrators are encouraged to contact Tom Amidon (TAmidon@omni-env.com) to reserve the opportunity to ask it or to have it asked anonymously during the session.

Panelists:

George Pavlou, Deputy Regional Administrator or Appointee  
United States Environmental Protection Agency Region 2

Bob Martin, Commissioner or Appointee

New Jersey Department of Environmental Protection

Example Topics of Interest:

1. Upcoming Rule Changes
2. Science Advisory Board
3. Status of Wastewater Management Plans
4. Implementation of Nutrient Criteria Enhancement Plan.

**Pennsylvania Professional Engineers** - The New Jersey Water Environment Association (NJWEA) currently offers Continuing Education Credits for New York Professional Engineers, we believe these and many of our other courses also meet the requirements of the Pennsylvania Professional Engineer's Continuing Education needs. The Pennsylvania State Board of Professional Engineers, Land Surveyors and Geologists (The Board) do not approve courses in advance. However, technical sessions provided by NJWEA should meet the Board's requirements if the PE keeps the program book and his/her certificates received after the completion of the technical sessions issued by the NJWEA."

## **NJWEA Spring Fling – 2011 Operations Challenge May 9 & May 10**

Come Join Us! At the NJWEA 2011 Annual Conference

Teams/Judges/Support

Staff/Sponsors:

The NJWEA has once again decided to host an Operations Challenge Competition. This competition will be held during the NJWEA's 96<sup>th</sup> Annual Conference and Exposition in Atlantic City, NJ. While the Conference is at Bally's Atlantic City the Operations Challenge Spring Fling will be held at the adjoining Caesars Atlantic City. The dates for the Spring Fling are May 9 and May 10, 2011. On Monday the Process Control and Laboratory Events will take place, along with the SDR Shoot Out. Tuesday the Safety, Collections, and Maintenance Events will be taking place.

Information about the NJWEA Spring Fling can be found at

[www.cmcmua.com/springfling](http://www.cmcmua.com/springfling). If

you have a question, please feel free to contact Michelle Geisinger.

For more information about the NJWEA Conference visit their

website at [www.njwea.org](http://www.njwea.org).

Your support is badly needed again this year so as the visiting teams said "A first class event" can be had again in 2011.

We do hope you can support the conference challenge. Stop in to cheer the teams on Monday & Tuesday in the Caesars Ball Room.

### **FACTS:**

Teams come from all across the Country and Canada.

We have room for 12 teams.

Registration began in January and will run through March. Registration will be on a first come first served basis and there will be a \$50.00 Team Registration Fee. Encourage your State Team to complete. As is our standard, we will try to follow the rules and regulations of the national competition to the best of our ability. This year we will be show casing the new Wilo Maintenance Event.
